

Science Whole School Unit Overview and Key Skills Checklist

Essential Learning Objectives (Chris Quigley):

Year 3

National Curriculum Unit	Key Skills (to be covered during the year) (from CQ Milestones)
To work scientifically	<ul style="list-style-type: none">• Ask relevant questions.• Set up simple, practical enquiries and comparative and fair tests.• Make accurate measurements using standard units, using a range of equipment, e.g. thermometers and data loggers.• Gather, record, classify and present data in a variety of ways to help in answering questions.• Record findings using simple scientific language, drawings, labelled diagrams, bar charts and tables.• Report on findings from enquiries, including oral and written explanations, displays or presentations of results and conclusions.• Use results to draw simple conclusions and suggest improvements, new questions and predictions for setting up further tests.• Identify differences, similarities or changes related to simple, scientific ideas and processes.• Use straightforward, scientific evidence to answer questions or to support their findings.
To understand plants	<ul style="list-style-type: none">• Identify and describe the functions of different parts of flowering plants: roots, stem, leaves and flowers.• Explore the requirements of plants for life and growth (air, light, water, nutrients from soil, and room to grow) and how they vary from plant to plant.• Investigate the way in which water is transported within plants.• Explore the role of flowers in the life cycle of flowering plants, including pollination, seed formation and seed dispersal.

<p>To understand animals and humans</p>	<ul style="list-style-type: none"> • Identify that animals, including humans, need the right types and amounts of nutrition that they cannot make their own food and they get nutrition from what they eat. • Describe the simple functions of the basic parts of the digestive system in humans. • Identify the different types of teeth in humans and their simple functions.
<p>To understand evolution and inheritance</p>	<ul style="list-style-type: none"> • <i>Identify how plants and animals, including humans, resemble their parents in many features.</i> • <i>Recognise that living things have changed over time and that fossils provide information about living things that inhabited the Earth millions of years ago.</i> • <i>Identify how animals and plants are suited to and adapt to their environment in different ways.</i>
<p>To investigate materials</p>	<p>Rocks and Soils</p> <ul style="list-style-type: none"> • Compare and group together different kinds of rocks on the basis of their simple, physical properties. • Relate the simple physical properties of some rocks to their formation (igneous or sedimentary). • Describe in simple terms how fossils are formed when things that have lived are trapped within sedimentary rock. • Recognise that soils are made from rocks and organic matter.
<p>To understand movement, forces and magnets</p>	<ul style="list-style-type: none"> • Compare how things move on different surfaces. • Notice that some forces need contact between two objects, but magnetic forces can act at a distance. • Observe how magnets attract or repel each other and attract some materials and not others. • Compare and group together a variety of everyday materials on the basis of whether they are attracted to a magnet, and identify some magnetic materials. • Describe magnets as having two poles. • Predict whether two magnets will attract or repel each other, depending on which poles are facing.

To understand light and seeing

- Understand that light appears to travel in straight lines.
- Use the idea that light travels in straight lines to explain that objects are seen because they give out or reflect light into the eyes.
- Use the idea that light travels in straight lines to explain why shadows have the same shape as the objects that cast them, and to predict the size of shadows when the position of the light source changes.
- Explain that we see things because light travels from light sources to our eyes or from light sources to objects and then to our eyes.

Subject Whole School Unit Overview and Key Skills Checklist

Essential Learning Objectives (Chris Quigley):

Year 4

National Curriculum Unit	Key Skills (to be covered during the year) (from CQ Milestones)
To work scientifically	<ul style="list-style-type: none">• Ask relevant questions.• Set up simple, practical enquiries and comparative and fair tests.• Make accurate measurements using standard units, using a range of equipment, e.g. thermometers and data loggers.• Gather, record, classify and present data in a variety of ways to help in answering questions.• Record findings using simple scientific language, drawings, labelled diagrams, bar charts and tables.• Report on findings from enquiries, including oral and written explanations, displays or presentations of results and conclusions.• Use results to draw simple conclusions and suggest improvements, new questions and predictions for setting up further tests.• Identify differences, similarities or changes related to simple, scientific ideas and processes.• Use straightforward, scientific evidence to answer questions or to support their findings.

<p>To understand animals and humans</p>	<ul style="list-style-type: none"> • Construct and interpret a variety of food chains, identifying producers, predators and prey. • Identify that humans and some animals have skeletons and muscles for support, protection and movement.
<p>To investigate living things</p>	<ul style="list-style-type: none"> • Recognise that living things can be grouped in a variety of ways. • Explore and use classification keys. • Recognise that environments can change and that this can sometimes pose dangers to specific habitats.
<p>To investigate materials</p>	<p>States of Matter</p> <ul style="list-style-type: none"> • Compare and group materials together, according to whether they are solids, liquids or gases. • Observe that some materials change state when they are heated or cooled, and measure the temperature at which this happens in degrees Celsius (°C), building on their teaching in mathematics. • Identify the part played by evaporation and condensation in the water cycle and associate the rate of evaporation with temperature.
<p>To investigate sound and hearing</p>	<ul style="list-style-type: none"> • Identify how sounds are made, associating some of them with something vibrating. • Recognise that vibrations from sounds travel through a medium to the ear.

To understand electrical circuits

- Identify common appliances that run on electricity.
- Construct a simple series electrical circuit, identifying and naming its basic parts, including cells, wires, bulbs, switches and buzzers.
- Identify whether or not a lamp will light in a simple series circuit, based on whether or not the lamp is part of a complete loop with a battery.
- Recognise that a switch opens and closes a circuit and associate this with whether or not a lamp lights in a simple series circuit.
- Recognise some common conductors and insulators, and associate metals with being good conductors.

Subject Whole School Unit Overview and Key Skills Checklist

Essential Learning Objectives (Chris Quigley):

Year 5

National Curriculum Unit	Key Skills (to be covered during the year) (from CQ Milestones)
To work scientifically	<ul style="list-style-type: none">• Plan enquiries, including recognising and controlling variables where necessary.• Use appropriate techniques, apparatus, and materials during fieldwork and laboratory work.• Take measurements, using a range of scientific equipment, with increasing accuracy and precision.• Record data and results of increasing complexity using scientific diagrams and labels, classification keys, tables, bar and line graphs, and models.• Report findings from enquiries, including oral and written explanations of results, explanations involving causal relationships, and conclusions.• Present findings in written form, displays and other presentations.• Use test results to make predictions to set up further comparative and fair tests.• Use simple models to describe scientific ideas, identifying scientific evidence that has been used to support or refute ideas or arguments.
To understand plants	<ul style="list-style-type: none">• Explore the role of flowers in the life cycle of flowering plants, including pollination, seed formation and seed dispersal.
To understand animals and humans	<ul style="list-style-type: none">• Describe the changes as humans develop to old age.• Describe the ways in which nutrients and water are transported within animals, including humans.
To investigate living things	<ul style="list-style-type: none">• Describe the differences in the life cycles of a mammal, an amphibian, an insect and a bird.• Describe the life process of reproduction in some plants and animals.• Give reasons for classifying plants and animals based on specific characteristics.

<p>To investigate materials</p>	<ul style="list-style-type: none"> • Compare and group together everyday materials based on evidence from comparative and fair tests, including their hardness, solubility, conductivity (electrical and thermal), and response to magnets. • Understand how some materials will dissolve in liquid to form a solution and describe how to recover a substance from a solution. • Use knowledge of solids, liquids and gases to decide how mixtures might be separated, including through filtering, sieving and evaporating. • Give reasons, based on evidence from comparative and fair tests, for the particular uses of everyday materials, including metals, wood and plastic. • Demonstrate that dissolving, mixing and changes of state are reversible changes. • Explain that some changes result in the formation of new materials, and that this kind of change is not usually reversible, including changes associated with burning, oxidisation and the action of acid on bicarbonate of soda.
<p>To understand movement, forces and magnets</p>	<p>Forces</p> <ul style="list-style-type: none"> • Explain that unsupported objects fall towards the Earth because of the force of gravity acting between the Earth and the falling object. • Identify the effect of drag forces, such as air resistance, water resistance and friction that act between moving surfaces. • <i>Describe, in terms of drag forces, why moving objects that are not driven tend to slow down.</i> • <i>Understand that force and motion can be transferred through mechanical devices such as gears, pulleys, levers and springs.</i> • Understand that some mechanisms including levers, pulleys and gears, allow a smaller force to have a greater effect.

**To understand the Earth's
movement in space**

- Describe the movement of the Earth, and other planets, relative to the Sun in the solar system.
- Describe the movement of the Moon relative to the Earth.
- Describe the Sun, Earth and Moon as approximately spherical bodies.
- Use the idea of the Earth's rotation to explain day and night and the apparent movement of the sun across the sky.

Subject Whole School Unit Overview and Key Skills Checklist

Essential Learning Objectives (Chris Quigley):

Year 6

National Curriculum Unit	Key Skills (to be covered during the year) (from CQ Milestones)
To work scientifically	<ul style="list-style-type: none">• Plan enquiries, including recognising and controlling variables where necessary.• Use appropriate techniques, apparatus, and materials during fieldwork and laboratory work.• Take measurements, using a range of scientific equipment, with increasing accuracy and precision.• Record data and results of increasing complexity using scientific diagrams and labels, classification keys, tables, bar and line graphs, and models.• Report findings from enquiries, including oral and written explanations of results, explanations involving causal relationships, and conclusions.• Present findings in written form, displays and other presentations.• Use test results to make predictions to set up further comparative and fair tests.• Use simple models to describe scientific ideas, identifying scientific evidence that has been used to support or refute ideas or arguments.
To understand plants	<ul style="list-style-type: none">• <i>Relate knowledge of plants to studies of evolution and inheritance.</i>• <i>Relate knowledge of plants to studies of all living things.</i>

<p>To understand animals and humans</p>	<ul style="list-style-type: none"> • Identify and name the main parts of the human circulatory system, and describe the functions of the heart, blood vessels and blood. • Recognise the importance of diet, exercise, drugs and lifestyle on the way the human body functions. • Describe the ways in which nutrients and water are transported within animals, including humans.
<p>To investigate living things</p>	<ul style="list-style-type: none"> • Describe how living things are classified into broad groups according to common observable characteristics. • Give reasons for classifying plants and animals based on specific characteristics.
<p>To understand evolution and inheritance</p>	<ul style="list-style-type: none"> • Recognise that living things have changed over time and that fossils provide information about living things that inhabited the Earth millions of years ago. • Recognise that living things produce offspring of the same kind, but normally offspring vary and are not identical to their parents. • Identify how animals and plants are adapted to suit their environment in different ways and that adaptation may lead to evolution.
<p>To understand light and seeing</p>	<ul style="list-style-type: none"> • Understand that light appears to travel in straight lines. • Use the idea that light travels in straight lines to explain that objects are seen because they give out or reflect light into the eyes. • Use the idea that light travels in straight lines to explain why shadows have the same shape as the objects that cast them, and to predict the size of shadows when the position of the light source changes. • Explain that we see things because light travels from light sources to our eyes or from light sources to objects and then to our eyes.

To understand electrical circuits

- Associate the brightness of a lamp or the volume of a buzzer with the number and voltage of cells used in the circuit.
- Compare and give reasons for variations in how components function, including the brightness of bulbs, the loudness of buzzers and the on/off position of switches.
- Use recognised symbols when representing a simple circuit in a diagram.
